

## RELEVANT INFORMATION

Due to information that has been going around in certain scenarios regarding the sale of shares, Grupo Argos S.A. reports that its participation shares in Celsia S.A. ESP has not decreased, nor in Cementos Argos S.A. On the contrary, Grupo Argos maintains confidence in the cement and energy businesses, ratifying that its stock level has not changed in these subsidiaries.

However, due to regular treasury operations at Grupo Argos, it is not unusual to perform short term investments under the REPO mode, that is, transactions with third parties on securities with covenants to repurchase, including bonds or shares. It goes without saying that Grupo Argos has adequate levels of cash flow to meet its commitments derived from these types of operations.
